

## Hotelier saves an estimated \$750,000 annually following integration of Hotel Management module with Unit4 ERP

Family-owned Canalta Hotels employs more than 3,000 people across Alberta, Saskatchewan, and Manitoba, Canada. What began as one motor inn has grown into a wide network comprising more than 40 properties across western Canada.

**INFO**

INDUSTRY: Hospitality

EMPLOYEES: 40-plus hotels, more than 3,000 staff

LOCATION: Alberta, Canada

PRODUCT: Unit4 Enterprise Resource Planning (ERP)

## The Challenge

Under five different brands, hotels have different mandated property management systems (PMS). Data was not consistently integrated with the rest of the back end, requiring an extra 90 minutes a day spent on data entry. Across more than 40 properties, that added up to 25,000 hours wasted, or roughly \$750,000 annually.

## How did Unit4 help?

- Integration of ServeVita Hotel Management module with existing Unit4 ERP creates a single, connected view of finance, billing, and other critical data across the hotel network.
- With Unit4 ERP as its cornerstone, data from the PMS is fully integrated, enabling complete financial data processing.
- Enriched, intelligent data brings to light previously hidden insights.
